copublished with the american geophysical union as american geophysical union special publication 71 this volume is a memorial to don l anderson former director of the seismological laboratory of the caltech institute of technology recipient of the crafoord prize the national medal of honor and numerous other awards a geophysicist extraordinaire he contributed much to our understanding of the structure and dynamics of the interior of earth the book comprised largely of chapters written at anderson s invitation reflects his interdisciplinary career it includes papers on anisotropy the seismic structure of the mantle mantle convection the statistics of melting anomalies planetary geology tectonics the thermal budget of earth lithospheric structure geochemistry and flood basalts

the author examines natural disasters around the pacific rim throughout history together with scientific data context to produce enlightening and highly readable entries on march 11 2011 a magnitude 9 0 earthquake struck off japan s coast triggering a powerful tsunami the massive destruction that resulted proved that not even sophisticated industrialized nations are immune from nature s fury written to take some of the mystery out of the earth s behavior this encyclopedia chronicles major natural disasters that have

occurred around the Pacific Rim, an area nicknamed the Ring of Fire because of the volatile earth that lies above and below the surface. The encyclopedia offers descriptions of deadly earthquakes, volcanic eruptions, and tsunamis through time. The entries provide in-depth information that promotes an understanding of the structure of the earth and earth processes and shares the insights of scientists whose work helps clarify the causes and effects of these cataclysmic events. At the same time, the work examines how the people and cultures of the Pacific Rim view this active part of the earth, how they live with the threat of disaster, and how they have been affected by major events that have occurred. Readers will come away with a holistic view of what is known, how this knowledge was gained, and what its implications may be.
